OUR 1959 INTRODUCTIONS

EL FUEGO, which means "fire" in Spanish, is a brilliant scarlet cactus with slight golden shadings. This startling flower, because of its color and form, is freely produced on long perfect stems. It is a 10-inch bloom and flowers are consistent in size and quality both early and late. As one visitor remarked, "What an eye-full that would be on a showroom table." We think dahlias can be better judged when seen growing out of doors but some colors are improved under artificial light. This one is dazzling in bright sunlight. It is one from our new cactus strain that we mentioned last year. Though not exactly a giant it is large for its type. **Strong Divisions — \$15.00 Net**

GERONIMO, named for a spectacular Indian chief of early Western days, is a giant bright ruby red informal with very broad petals. It is "another red" but an unusual brightly colored one and a most outstanding bloom. Can be grown 12 to 14 inches with at least four flowers to the bush at the same time. Center bloom on the plant will be short stemmed and should be pinched out early to allow the laterals to make strong growth. Will stand adverse weather conditions and is first class in all respects, one of our best introductions of recent years. Guaranteed to please.

OUR 1958 INTRODUCTIONS

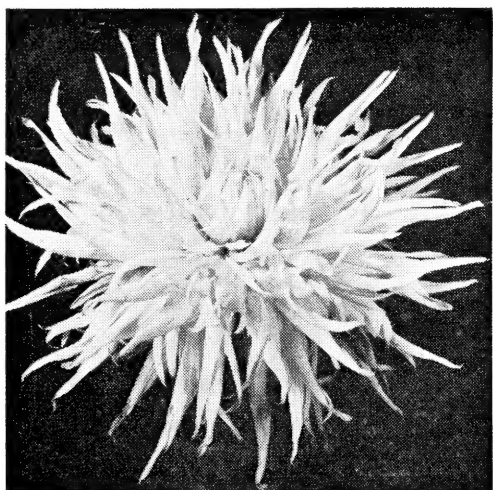

ACAPULCO — Semi-cactus. Bright begonia rose with yellow at center. This is a large flower in a striking combination of color, not a blend, but two distinct tones in lively shades. Bloom is composed of many petals and is very close in formation to the true cactus type. An early and a free bloomer on the best of stems. Nothing else like it that we have seen. **\$10.00**

ANTOINETTE — Straight cactus. Clear orchid pink with pure white center. Of unusual color and large for this type. It is easy to grow and supplies many fine blooms through a long period that are useful for all purposes. **\$7.50**

SAN SIMEON — Informal decorative. Creamy pink with reverse of petals a deeper pink which shows at the center of the giant bloom. A flower of ideal formation and real beauty. There are many fine pink dahlias and we believe this one ranks among the best. Habit of growth is very satisfactory. **\$10.00**
